# OCEAN SOTERIA WATER TANK

Ocean Soteria Water tanks combine food-grade plastics with copper guard, offering effective antimicrobial benefits that inhibit bacterial growth, especially in water storage. This innovative design ensures 100% safety for your drinking water, proving peace of mind and a reliable solution for safe, clean hydration for you and your family

## COPPER GUARD MATERIAL

The Copper Shield layer of Ocean Soteria water tanks is made from 100% food-grade material, ensuring safety for direct contact with stored water. It offers 99.9% effectiveness against microbial contaminants, enhancing the quality and safety of your drinking water significantly.

## MIDDLE LAYER

The black middle layer of Ocean Soteria water tanks acts as an essential barrier against sunlight, effectively preventing light penetration. This feature mitigates microbial growth, helping to maintain the integrity and quality of the stored water.

## OUTER LAYER

The outer layer of Ocean Soteria water tanks is made from white UV-resistant material, providing protection from harmful ultraviolet radiation and reducing heat absorption. This layer also prevents polymer degradation, extending the tank's service life.

## DIMENSIONS

Capacity	Diameter	Height	Manhole
Ltr	mm	mm	mm
500	880	1010	400
750	1010	1140	400
1000	1110	1280	400
1500	1250	1530	400
2000	1400	1565	400
2500	1530	1680	400
3000	1590	1840	480
5000	1860	2150	480

All dimensions are mould dimensions. 2 to 4% of shrinkage depends upon the different raw materials. There will be 2 to 4% tolerance on the above dimensions
